Editorial

Christmas is almost upon us, which means last minute tasks for all the family but at the same time keeping logistics flowing for the company.

As the saying goes it has been strange year – for our many contacts in the Marine sector it has been a busy time advancing and firming up on ideas and projects for the time when we finally exit the Pandemic.

Certainly Food Service has taken the back seat to Retail ready concepts.

During shut down we advanced many projects. We thank you for your on- going interest and the chance to maintain a regular dialogue.

We will have a modest holiday from 24th December until 14 th January. Emails will be checked regularly.

Wishing you a Happy Christmas and a more prosperous New Year.

Tony Rumbold

COVID protection with BIO/UV

The ideal system for safely disinfecting any surface!

- Disinfection without any chemicals
- Cost-effective, powerful, quick, and easy-to-use... Simple the best surface disinfection system available.
- Certified to AFNOR standard NF T72-281. Destroys 99.999% of bacteria and 99.99% of viruses, including SARS-COV-2 (Covid-19) by 2 independent laboratories
- Suitable for all types of surfaces

How UV works

At a wavelength of 254 nanometres, UV-C inactivates micro-organisms (viruses, bacteria, algae, yeasts, moulds, etc.) by penetrating their DNA, thereby disrupting their metabolism until they are completely destroyed.

Advantages of BIO-SCAN

- Certified process with demonstrated efficacy against SARS-COV-2 (Covid-19)

- Ultra-rapid treatment time of just 4 to 10 seconds!
- Practical, ergonomic, easy-to-use-by-anyone concept
- No chemicals, side effects or health hazards
- Economical: very reasonably priced, rapid return on investment
- Can treat all surfaces
